Supporting North Carolina’s Families with Greatest Needs Since 1969

EFNEP helps address the challenges limited resource families face when introducing healthy changes through nutrition education, cooking classes, physical activity strategies, and shopping on a limited budget. EFNEP provides:

- Peer-to-peer, hands on education in the community
- Healthy, low-cost recipes
- Simple strategies to help families move more together

North Carolina’s Challenges

- In North Carolina, 1 in 5 children live in poverty.
- North Carolina’s adult obesity rate is currently 32%.
- 15.2% of 2- to 4-year-olds from low-income families are obese. This makes us the 16th most obese state.
- North Carolina has the 15th highest rate of diabetes and the 11th highest rate of hypertension.

WHAT IS EFNEP?

EFNEP serves limited-resource families with young children, school-age youth, and pregnant teens through a series of lessons offered by paraprofessionals and volunteers, many of whom are indigenous to the population. In 2019, EFNEP served 45 counties in North Carolina. Participants learned how to:

- Make wise food choices
- Increase daily physical activity
- Manage food resources
- Practice food safety

Volunteers Strengthen EFNEP

In 2019, 41 adults and youth donated time to EFNEP, making a difference in their own communities and contributing to EFNEP’s ongoing success.
EFNEP SUCCESS

McDowell Students Choose Healthier Drinks

One student in the McDowell County Expanded Food and Nutrition Education Program (EFNEP) changed his eating and exercise habits. One of the lesson activities involved learning how much sugar was in popular drink choices by physically measuring the amount of sugar in their favorite beverages. The EFNEP Educator taught students the importance of reading labels to understand the amount of sugar.

One student commented, “After taking your class I stopped looking at food as a thrill and more as a source of nutrients. I started to read the labels and see what they had in them. It was actually fun figuring out what foods and drinks had in them. Mrs. Bryan’s class was hands-on and fun. It had plenty of activities and experiments. She told us about new things that I did not know.”

The EFNEP Educator in McDowell county partnered together with the Early Head Start of McDowell to offer a series of nutrition education classes to 10 teachers in this facility. EFNEP helps adult participants learn skills and strategies to feed their family nutritious meals on a limited budget and improve their overall health. Several recipes and tips were shared on how to cook healthier and how to cook on a budget. EFNEP has developed a program that can be shared with the Head Start teachers to help them model healthy eating and physical activity to the children in their care and to serve as an advocate for healthy eating and physical activity for the families served by their Center.

One participant shared that she and her husband eat out a lot because of time restraints and because, “It’s just easier.” The EFNEP Educator challenged the teachers to create a weekly menu and stick to it. Most were surprised at how easy it was to follow when they took a few minutes to write it out, shop and prepare. The participant said she saved $70 for the week by cooking instead of eating out. She used several of the recipes shared during the EFNEP class.

This project is a two-year project engaging teachers, parents, and children in the Head Start Center. EFNEP works with other community partners to help the Center make changes to support healthy eating and physical activity. It begins with the teachers as models and advocates. The comments from teachers in the program demonstrates they are on the path to advocacy for the families they serve.

Distributed in furtherance of the acts of Congress of May 8 and June 30, 1914. North Carolina State University and North Carolina A&T State University commit themselves to positive action to secure equal opportunity regardless of race, color, creed, national origin, religion, sex, age, or disability. In addition, the two Universities welcome all persons without regard to sexual orientation. North Carolina State University, North Carolina A&T State University, U.S. Department of Agriculture, and local governments cooperating.
